

# NICOLAS MENDOZA

## ABOUT ME

I am a dedicated industrial engineer with a strong work ethic, capable of effectively solving problems in both creative and efficient ways. My experience in continuous improvement has provided me with a solid foundation in data analysis, process optimization and project management, skills that I consider fundamental for any company seeking to improve its efficiency and competitiveness. In addition, my experience as a full stack developer, although mainly acquired in freelance projects, has allowed me to become familiar with cutting-edge technologies and develop successful web solutions using the MERN stack.

## WORK EXPERIENCE

### Freelance projects

2022 – 2023

#### Inventory Management

**Technologies:** MERN Stac - Next JS

Creation of a web application for inventory management of carbon credits adjusted for a specific company, tracking of transactions (purchase/sale), downloads, users, and customer data.

#### Bakery

**Technologies:** React JS, Node, Mongo, CSS+

Creation of e-commerce for Pastry Shop, admin panel and web order management (dates, delivery, stripe payments).

#### ALLCOT GROUP & SM Contenedores

Business website creation using CMS platform such as WordPress and applying HTML and CSS code for styles required by customer.

#### E-commerce Food

E-commerce creation for food sales using Shopify CMS platform, code management, small changes using JavaScript adjusted to liquid.

### Assistant tutor – Rolling Code Argentina

2021 - 6 months

Tutor assistant in programming school

JS, HTML and CSS proofreading and support

Job proofreading and sprint management in projects
